

Entrepreneur Security Measures Policy

Srithai Superware Public Company Limited, a manufacturer and distributor of plastic products for industrial and household appliance applications is strongly committed to ensuring the safety of its products. Therefore, the Company has implemented a system of safety standards for business operators, with the following practices:

1. The Company is dedicated to maintaining product safety throughout all production processes and related activities, including the operations of converters, sales, purchasing/procurement, production, warehousing, logistics, and delivery. Products are delivered to customers with high quality and punctuality, ensuring customer satisfaction and confidence in receiving safe products.
2. The Company conducts building and inspections of internal facilities to maintain safe conditions. It also adheres to internal and external environmental control standards to prevent any impact on the products.
3. The Company encourages knowledge development and awareness among all departments, converters, and stakeholders involved. It also fosters innovation in safety to promote sustainable development.
4. Strictly comply with the requirements of the Thai Customs's announcements and all other relevant regulations.
5. Establish, control, monitor, verify, and maintain documentation related to the security measures for operators.
6. Commit to the continuous development and improvement of the operator security system.

The Company is committed to consistently promoting and supporting various activities to ensure they are carried out and achieved in alignment with the above policy framework. This policy is communicated to employees and relevant parties, and is also disseminated to the public.
