

Environment Policy

Srithai Superware Public Company Limited recognizes the responsibilities towards society and environment, with the commitment to conservation and protection within and outside the organization, as well as promoting the management and development of production processes to minimize impacts on the society and environment, as follows:

1. Comply strictly with requirements, standards, and the laws with regard to environment, which is affected by the Company's operating activities.
2. Conduct business operations with social and environmental responsibilities by focusing on the development of production processes and promoting innovations, while controlling, preventing, and reducing risks from the Company's activities through the consideration of life cycle perspectives towards lower impacts on the environment and surrounding communities.
3. Adhere to develop, improve, and monitor environmental operations by setting goals and assessing risks on performance and environmental impacts, as well as improving the operations continuously to achieve the goals.
4. Manage waste from production process efficiently by reducing the amount of excessive use (Reduce), lowering various losses and finding a way to reuse (Reuse), and putting remaining waste through a recycling process (Recycle).
5. Set targets to reduce greenhouse gas emission, water and energy use, with long-term waste management from production processes towards the most efficient consumption of resources in all aspects.
6. Save the ecosystem and the Company's supply chain by cooperating with partners, service providers, contractors, and alliances for production, transportation, and distribution to customers.
7. Raise awareness by disseminating environmental knowledge to employees and stakeholders for an understanding on environmental changes, conservation of natural resources, and environmental and ecosystem impacts.
8. Disclose environmental goals and performance to the public so that all stakeholders are informed about opinions and advice for improvement on issues that may affect the communities towards the sustainable coexistence between the Company and the communities.
9. Review the policies continuously with concerns on social and environmental impacts and stakeholders.

This announcement is made for acknowledgment
and compliance by all concerned.
